Bio

I'm a senior software developer with five years of full-stack development experience in areas that spread across health care, event planning, marketplaces, aerospace, and home renovations. I'm passionate about engineering excellence, mentoring fellow developers, UX, and developer experience.

Experience

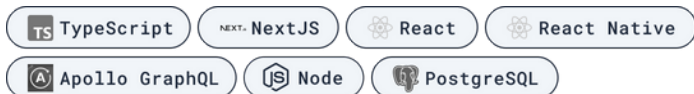

Senior Software Developer

Block Renovation - Full-time

January 2022 - January 2023

- Block simplifies the renovation process and gives homeowners certainty on outcomes, quality, price, and time.
- On the Scope Squad to help ensure the internal administrative application made correct home renovation estimations a smooth process from measurements to design.
- Engineering lead on the Labor V2 initiative to help reorganize how we categorize and display labour items for our contractors. This initiative spanned Block's admin tool, homeowner dashboard, and the contractor/builder mobile application.
- Led initiatives to help improve collaboration between engineers and product designers, which most recently was implementing Chromatic in the CircleCI pipeline to deploy our Storybook components.

Carleton University
2012 - 2016
B.A - Criminology & Criminal / Business Law (Minor)

Certifications

BrainStation (2018)
UX Design Diploma

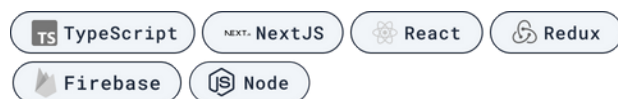

Senior Software Developer

Planned - Full-time

October 2020 - December 2021

- Planned makes it easy for anyone to plan successful events while giving procurement teams the visibility and control they need to maximize their budget.
- On the Planned Marketplace team to assist event planners having the ability to search, filter, and find the best-suited vendors and venues for their next event.
- Attended daily stand-up, contributed to product road mapping, and provided insight into short-term and long-term technical solutions.

Web Development Instructor

BrainStation - Part-time

July 2020 - January 2021

- BrainStation is the global leader in digital skills training and workforce transformation.
- Taught BrainStation's twelve-week Web Development Diploma program.
- Delivered lectures and provided expert technical guidance to students building exciting projects using HTML, CSS, and JavaScript.
- During the twelve-week session, I provided guidance, consistent feedback, and assessment for all students to ensure they were on track to complete their diploma.

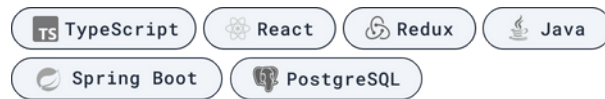

Software Developer

Let's Warp Inc. - Full-time

December 2019 - October 2020

- Let's Warp Inc. is an information technology company focused on the development and commercialization of innovative Quality Assurance solutions for the aerospace industry using powerful algorithms, smartphones, connected devices, and artificial intelligence technologies through its proprietary web & mobile platform named WILBUR™.
- Attended daily stand-up, contributed to product road mapping, and provided insight into short-term and long-term technical solutions.

- I managed a team of six junior developers, provided peer coding sessions, one-on-one feedback sessions, and overall guidance.

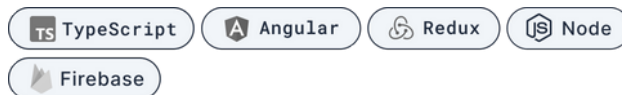

Technical Lead

Detour UX - Full-time

April 2019 - August 2019

- Detour UX is a User Experience Design Agency in Ottawa and Toronto specializing in creating digital solutions for eCommerce, Healthcare and Association clients.
- Internally managed junior developers, oversight all development-related projects, and ran daily scrums/followed agile methodology.
- Ran daily scrums with fellow developers, managed and oversight all development projects, and mentored junior developers.
- On a day-to-day basis, I would attend client meetings and stand-ups to provide context and updates on a given project while creating alignment for their business goals and deliverables.
- I managed and completed my own full-stack development projects while assisting UX and Design Department with any technical requirements.

Software Developer

Detour UX - Full-time

November 2017 - April 2019

- Provided consulting and technical solutions to clients in the of e-commerce, healthcare, and insurance space.
- Attended daily scrums with fellow developers/consultants, worked directly with product managers and owners, and helped insure deliverables were met on time.
- Managed and completed my own individual full-stack development projects while also assisting UX and Design Department with any technical requirements.
